DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, 15-20 drawn to a portable welding apparatus, classified in class 174, subclass 52.1.
 - II. Claims 9-11, drawn to a shield, classified in class 361, subclass 212.
 - III. Claims 12-14, drawn to a method of providing electrical shielding apparatus, classified in class 29, subclass 840.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed such as the apparatus does not require the shield being inverted U-shaped. The subcombination has separate utility such as the shield can be used with other electrical devices.

Inventions III and I&II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as

claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the apparatus does not the internal surface having a plurality of ribs.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
